SPECIAL FIRE-FIGHTING PROCEDURES:	Firefighters should wear proper protective equipment and self-contained breathing apparatus with full face piece operated in positive pressure mode. Move containers from fire area if safe to do so. Water spray may be useful in cooling equipment exposed to heat and flame.

SECTION 6 – ACCIDENTAL RELEASE MEASURES

PERSONAL PRECAUTIONS:	Restrict access to area until completion of clean up. Ensure clean up is conducted by trained personnel only. All persons dealing with clean up should wear the appropriate protective equipment including self-contained breathing apparatus. Refer to Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION, for additional information on acceptable personal protective equipment.
ENVIRONMENTAL PRECAUTIONS:	Ensure spilled product does not enter drains, sewers, waterways, or confined spaces. If necessary, dike well ahead of the spill to prevent runoff into drains, sewers, or any natural waterway or drinking supply.
METHODS AND MATERIAL FOR CONTAINMENT AND CLEAN UP:	Ventilate area of release. Stop leak if you can do so without risk. Use only non-sparking tools and equipment in the clean-up process. Contain and absorb spilled liquid with non-combustible, inert absorbent material (e.g. sand), then place absorbent material into a container for later disposal (see Section 13).
SPECIAL SPILL RESPONSE PROCEDURES:	In case of a transportation accident, contact CHEMTREC at 1-800-424-9300 or International at 1-703-527-3887.
